Introduction to Lighthouse All-inclusive "U.S. PNC Strips" Albums

As from **Jan. 1, 1981,** U.S. coils stamps have - at fixed intervals - the imprint of a tiny **Plate Number** right unterneath the stamps´design. Depending on what presses they were printed on, there are plate numbers

every 24th stamp on the COTTRELL presses		(1981–1985)
every 52nd stamp on the Intaglio B press		(from 1981)
" 48th " " " " C "		(" 1982)
" 48th " " " " D "		(" 1986)
" 24th " " " Photogravure ANDREOTTI press.		

PART 1 of the Lighthouse PNC STRIPS album **(REF. 53 PNC/1 SF)** covers the whole COTTRELL press coil range from **1981-1985.** At the end of 1985, the last of the COTTRELLS was dismantled and scrapped. With this event, the familiar **"Joint Lines",** and likewise the **"Overall** Tagging" of coil REGULARS (= unprecanceled) **had become a thing of the past.**

PART 2 is quite a separate set of pages **(Ref. 53 PNC/2 SF)** and covers those coils, also starting from 1981, that came off the modern presses which gradually took over the work from the veteran Cottrells. These newer coils are printed from seamless sleeve type cylinders. They have **no joint lines** and the unprecanceled REGULARS are now being **"Block Tagged".** (Precancels remain UNTAGGED as before.)

Spaces and mounts are so designed that they will hold - whatever you have or prefer - either **PS3** or **PS5**, and in the case of 3L & 2R gaps, even **PS7+** strips. What with the accompanying descriptions and individual illustrations, there is no need for any additional explanations. Even so, the editors suggest to consult the "PLATE NUMBER COILS CATALOG" by S.G. Esrati of Shaker Heights, OH, if you wish to obtain still further details. Designations of the different precancel "styles" come from that catalog and are being used in the albums by courtesy of George V.H. Godin.

TAGGING: The phosphorescent tagging of U.S. stamps will become visible under **shortwave UV** light, such as the Lighthouse "L-85" Shortwave (254 nm) Ultra-Violet Portable Lamp will give off. (**Caution:** Avoid direct exposure to shortwave UV light as it might burn your eyes. Wearing eyeglasses will screen the rays and provide protection.)

GENERAL: Apart from the logic of dividing the PNCs into PARTS 1 & 2 as explained above, here the arrangement and sequence of **pages:**

	PART 1(1981/85) COTTRELLS	**PART 2 (1981 to date) OTHER PRESSES**
REGULARS and/or PRECANCELS		
Transportation Series	PNC 1 // 23	PNC 25 et seq.
Consumer Education	PNC 24	–
Flags & Undenominated Stamps	–	PNC F 1 et seq.
18c Monument / 21.1c Letters	–	PNC G 1 " "
Officials	–	PNC O–1 " "

SUPPLEMENTS: PART 2 will be up-dated by annual **Supplements** (or possibly only every other year, depending on the number of new issues during any one year).

If you otherwise wish to widen the scope of your collection by adding varieties, strips with "hash marks", different paper and gum types, FDCs, PNC Souvenir Pages, and the like, we suggest choosing from the wide range of 16 different **LIGHTHOUSE BLANCO "LB"** album leaves as illustrated and described in the annual "Lighthouse Product Guide". An "LB-5 Vertical", for instance, has five pockets for a strip each of up to 13 U.S. coil stamps.- The "Guide" can be had for free from your dealter or the Lighthouse distributors in your country.

PNC SINGLES: Should you save **singles** as well, either USED or MINT, Lighthouse can serve you with the following sets of pages:

		Ordinary Pages without mounts	**SF-Hingeless Pages with mounts**
PART I :	COTTRELL Press PNC SINGLES	Ref.53 CS/1	Ref.53 CS/1 SF
PART II:	Other Presses PNC SINGLES	" 53 CS/2	" 53 CS/2 SF

BINDERS: The PNC sets of pages are best inserted in a **DP-53** PERFECT 2-post turn-bar binder with "USA" on the spine, or in a **DE-red** EXCELLENT 13-ring binder (w/o. name of country on spine). Using the latter has the advantage that the pages with long strips are apt to be bent less when being turned over.- Matching **SLIP CASES** for either one of the aforementioned binders have Ref. No. **KA-red.**

Vorwort zu den U.S.A. "PNC Rollenstreifen" - Alben

Die nach dem **1. Jan. 1981** hergestellten USA-ROLLENMARKEN weisen in bestimmten Abständen unterhalb des Markenbildes winzige **Plattennummern** auf. Das gilt für

jede 24. Marke bei den COTTRELL-Druckpressen	(1981-1985)
jede 52. Marke bei der Stichtiefdruck "B" Presse	(seit 1981)
" 48. " " " " "C" "	(" 1982)
" 48. " " " " "D" "	(" 1986)
" 24. " " " Rastertiefdruck ANDREOTTI-Presse	(" 1985).

Diese PNCs = Plate Number Coils = **ROLLENMARKEN mit PLATTENNUMMERN** werden vornehmlich als Dreierstreifen **(PS3** = Plate Strips of 3), bei besonderen Eigenheiten aber auch als Fünferstreifen **(PS5)** oder in gar noch längeren Streifen **(PS7+)** gesammelt. Dadurch wird zunächst einmal dokumentiert, daß die Marken links und rechts der "Nummernmarken" keine Nummern aufweisen.- Das Albumwerk gliedert sich in zwei Teile:

TEIL 1 **(Ref.53 PNC/1 SF)** umfaßt alle jene Rollenmarken, welche von 1981-1985 noch auf den altgedienten **"COTTRELL"-** Druckpressen gedruckt worden waren. Die Marken sind daran erkenntlich, daß längs der rechten Zähnung der Nummernmarke eine **"Farblinie"** verläuft. Ein weiteres Erkennungszeichen der COTTRELL-Drucke ist, daß die Marken unter kurzwelligem UV-Licht **ganzflächig phosphoreszieren** (="Overall Tagging"). Merke jedoch: das gilt n i c h t für Marken mit "Vorausentwertung"; diese sog. "Precancels" weisen nämlich k e i n e Phosphoreszenz auf, d.h. sie sind UNTAGGED. – Ende 1985 wurde die letzte der alten COTTRELL-Pressen verschrottet. Teil 1 stellt also ein abgeschlossenes Sammelgebiet dar und erfordert keine Nachträge.

TEIL 2 **(Ref. 53 PNC/2 SF)** deckt diejenigen PNCs ab, welche auf den modernen Druckpressen gedruckt worden sind. Dabei gibt es **keine Farblinien** mehr und die nicht vorausentwerteten Marken (= REGULAR Coils) haben einen **Phosphoreszenz-Aufdruck, der nur das Markenbild abdeckt** (= Block Tagging).- TEIL 2 wird im übrigen durch zukünftige **Nachträge** ergänzt werden.

Inhaltsverzeichnisse sind der Einfachheit halber dem obenstehenden englischen Vorwort unter "GENERAL" zu entnehmen. Für eine beliebige Erweiterung des Sammelgebiets werden die **LEUCHTTURM BLANCO "LB"** Albumblätter empfohlen. Deren 16 Varianten sind dem alljährlich erscheinenden LEUCHTTURM-Verlagsverzeichnis zu entnehmen.

Vorausentwertungen (VEs als Frankatur für Massenauflieferungen): Wenn Felder für "VEs" mit **"No Gap"** überschrieben sind, bedeutet das, daß sich innerhalb eines Fünfer- oder auch Siebener-Streifens keine Unterbrechungs-Lücken (= no gap) bei den zwei Entwertungslinien zeigen lassen. In Klammern gesetzt wird aber gesagt, wo sich innerhalb einer langen Markenrolle solche Lücken befinden. So bedeutet z. B. **4L,** daß es eine Lücke bei der **vierten** Zähnungsreihe **links** von der "Farblinie" gibt. Tritt die Lücke längs der "Farblinie" auf, nennt sich das eine **"line gap",** die selbst auf einem kurzen Dreierstreifen ersichtlich ist. **3R** allerdingswäre eine Lücke **drei** Zähnungsreihen weiter **rechts** davon, und um diese zu dokumentieren, müßte man schon einen Neuner-Streifen haben.

PNC Rollen-EINZELMARKEN. Für Sammler, welche PNCs außer in Streifenform auch als **EINZELMARKEN** sammeln möchten, hält der Verlag gleichfalls Blattsätze zur Verfügung und zwar:

		NORMAL-Blattinhalt (ohne Schutztaschen)	**SF-Blattinhalt (mitSchutztaschen)**
TEIL I :	COTTRELL PNC-EINZELMARKEN (1981-1985)	Best.Bez.53 CS/1	53 CS/1 SF
TEIL II:	Andere, ohne Farblinie, nur No. (1981 ff.)	" " 53 CS/2	53 CS/2 SF

Plate 2

Note: Plates 3 and 4 were used for printing **precancels** only. —
Besides all those on pages 10A, B & C, yet another precancel version was issued in mid-August 1986, printed on the **B-Press,** though. Carrying again plate number 1, this one has no "joint lines" and the paper appears whiter (cleaner). Also, the design is about 1/4 mm narrower, since the B Press prints from sleeve type cylinders instead of two curved and necessarily stretched Cottrell press plates joined together. Another difference is that the B-Press plate numbers appear every 52nd stamp in coils instead of every 24th stamp as in Cottrell coils. Also, the precancel **gap** is now 26 stamps apart instead of the former 12. You find this item in PNC - Part 2.

P.2-49 and P.2-85 The 1995 PNC catalog RICHARD J. Nozar 8th Ed.

Note A "Hash Mark" variety exists in positions 3L R on some coil rolls. The Hash Mark is a vertical black line approx 1.5 mm tall below the bottom precancel line. The reason for the appearance of this Hash Mark has not been determined but appears on the Cottrell press version. This variety missings from most collections. Six perforation rows to the Right or Left of the Precancel gap.

Regular (Unprecanceled) Issue of April 2, 1985, with "Joint Line"

"Stanley Steamer",
the first steam-powered automobile in New England

Plate 1 – „Stanley Steamer 1909" = 18 mm wide

Plate 2 – „Stanley Steamer 1909" = 18 mm wide

Note: Besides the Stanley Steamer precancels on the following page, another version thereof was issued during the third quarter of 1987 which had been printed on the **B Press.** Though carrying plate number 1 again, it otherwise meant no joint lines and the design being slightly narrower. And, of course, B Press plate numbers appear only every 52nd stamp in the coil. You will find that novel "Stanley Steamer" in PNC - Part 2.

Hudson River-type Iceboat

Plate 1 - Paired with Plate 2

Plate 2 - Paired with Plate 1

Plate 3 - Paired with Plate 4

Plate 4 - Paired with Plate 3

SCRATCH Throughand Below 1 of 142C very faint need 10x

Note: A "B Press version" of the 14c Iceboat was issued Sept. 30, 1986. While not having been re-engraved, there were no "joint lines" any more and the paper appears whiter (cleaner). Yet the surefire way to tell the stamps apart is under shortwave UV light: the Cottrell versions have overall tagging whereas the B Press stamp features block tagging (i. e. only design portion being tagged). You find the B Press version in PNC - Part 2.

Caution: Avoid direct exposure to shortwave UV light as it can cause sunburn and burn the eyes. Wearing eyeglasses will screen the rays and provide protection.
