

Anotados 12 c

After a long investigation of the postal fraud, the government decided to stop the financial losses by creating a new stamp which started on April 1, 1872. As an interim measure while the new stamps were printed, all stamps were recalled, including unused postal forgeries, and on March 5, 1872 the post master reissued them by printing them *ANOTADO*. The latest recorded use is April 25, 1872. Anotados were used only from Mexico City. They are mostly unused as they were valid only for 40 days.
